

Accurate Biometrics Proudly Announces Its One millionth Fingerprint Scan

October 22, 2012. After 12 years of providing livescan fingerprint services to customers primarily throughout Illinois, but also most recently to customers in California and throughout the United States, Accurate Biometrics proudly announces it has captured its 1,000,000th fingerprint record. Company owner, Peggy Critchfield and her dedicated staff of management and operations personnel realize this accomplishment is more than just a very large number. Rather, this number represents valuable criminal history information that was made available to potential employers such as schools, nursing homes, park districts and state licensing agencies as a result of Accurate Biometrics' dedicated fingerprint technicians providing livescan fingerprint services to the potential employees and licensees. Information is power. Criminal history information gives employers the power to protect the vulnerable people they serve. When an employer learns that an applicant for employment is a convicted felon, having served prison time under an alias name, without the fingerprint check, this potentially dangerous person would have been given access to members of our most vulnerable populations. Additionally the Illinois State Police's dedication and commitment to livescan technology for non-criminal justice use has allowed individual citizens access to the criminal history record database for their own record requests and the ability to authorize the fingerprint-verified report to be disseminated to someone other than themselves.

"Our business has grown through the hard work of our employees and the dedicated efforts of our legislators throughout the country charged with passing laws that will help protect our citizens from harm. Our work is very rewarding and having reached this significant mark with our one millionth print is the icing on the cake", said Peggy Critchfield.

Headquartered in Chicago, Illinois, Accurate Biometrics provides livescan fingerprinting services for all Illinois State licensing including daycare, nursing, security, gaming, etc. and serves both public agencies and private companies. In addition Accurate Biometrics provides livescan fingerprinting to the California Department of Insurance for licensing applicants and to agencies and individuals requesting FBI criminal history responses using our dedicated connectivity to the FBI Criminal Justice Information Services (CJIS) Division.

Accurate Biometrics is a Federally Certified Woman-Owned Small Business (WOSB) and a certified Illinois Small Business, and Female Enterprise (FBE).
